environmental change, health crises, education, and children's personal and political development. Beginning with a literary-historical overview, *Children and Biography* proceeds to examine 21st-century examples and trends such as illustrated texts including *Women in Science*, the *Fantastically Great Women Who...* books, *Rebel Dogs*, *Goodnight Stories for Rebel Girls*, *Kids Who Did*, *My Beautiful Birds* and *The Journey*. The book also considers archives of children's writings and drawings, in particular the testimonies of child asylum seekers, children's biographical art, and 'Lockdown diaries' produced during the Covid-19 pandemic. By analyzing these works alongside empirical studies into how such material is received by child readers, and how texts generated by children are perceived both by them and their parents, this book provides new knowledge on how biographies for children are produced and read. Comprehensive and

original, *Children and Biography*, presents an ethical methodological framework for scholarly practice when reading, witnessing and interpreting children's life narratives. The book offers a mandate for future researchers: to place children's voices and writing at the centre of inquiries in ways that facilitate genuine agency for child authors.

Jungle Night (comes with 2 free audio downloads, Yo-Yo Ma, cello) Sandra Boynton
2021-03-23 Sandra Boynton and Yo-Yo Ma! Plus snoozing

jungle animals! Two celebrated artists come together for JUNGLE NIGHT, a soothing bedtime board book. (Okay, MOSTLY soothing.) The book guides us through the jungle to hear the distinctive, gentle snore of each animal: "Listen to the tiger: ZEEE-ZOOO-HAAA. Listen to the cheetah: CHEE-CHEE-TAAAH." A free downloadable JUNGLE NIGHT recording offers a narration of the book, with each and every animal snore interpreted by the expressive, playful cello of Yo-Yo Ma. He even does the elephant's stop-the-show snore—though admittedly that took Ma's cello PLUS the classic horn salute of the James R. Barker steamship. (Seriously.) All of this fabulousness leads into the coolest lullaby ever: "Jungle Gymnopédie No. 1", a polyrhythmic jungly arrangement by Boynton of Erik Satie's renowned piece, with Yo-Yo Ma on cello, guitar played by Ron Block of Alison Krauss Union Station, and drums by Kevin MacLeod. "Yo-Yo and I chose this piece

because it's the most gorgeous and mesmerizing night song imaginable," explains Boynton. "And there was surely nothing else that could get those animals back to sleep after that elephant blast."

Snowflake Bentley Jacqueline Briggs Martin 2020-10-20 In this Caldecott Medal-winning picture book, the true story of Wilson Bentley and his singular fascination with snowflakes is rendered in rich prose and gorgeous artwork, perfect for the holidays, snow days, and everyday. Wilson Bentley was always fascinated by snow. In childhood and adulthood, he saw each tiny crystal of a snowflake as a little miracle and wanted to understand them. His parents supported his curiosity and saved until they could give him his own camera and microscope. At the time, his enthusiasm was misunderstood. But with patience and determination, Wilson catalogued hundreds of

snowflake photographs, gave slideshows of his findings and, when he was 66, published a book of his photos. His work became the basis for all we know about beautiful, unique snowflakes today. This biographical tribute to a very special farmer is the perfect holiday gift or snow day read.

qualitative, the volume features the work of authors from numerous countries, from differing disciplines, and approaches. A key addition in a corpus of literature which has until now been restricted to studying the childhood, adolescence and youth of the children of immigrants, the material includes analysis of longitudinal and transnational efforts to address challenges such as defining the population to be studied, and the difficulties of follow-up research that spans both time and geographic space. In addition to perceptive reviews of extant literature, chapters also detail work in surveying the children of immigrants in Europe, the USA, and elsewhere. Authors address key questions such as the complexities of surveying each generation in families where parents have migrated and left children in their country of origin, and the epistemological advances in methodology which now challenge assumptions based on the Westphalian nation-state

paradigm. The book is in part an outgrowth of temporal factors (immigrants' children are now reaching adulthood in more significant numbers), but also reflects the added sophistication and sensitivity of social science surveys. In linking theoretical and methodological factors, it shows just how much the study of these second generations, and their families, can be enriched by evolving methodologies. siblings. In the 1880s and 1890s she worked as a stenographer, journalist, and fiction writer in Montreal, often writing under the name she has come to be known by, Sui Sin Far (Water Lily). She lived briefly in Jamaica and then, from 1898 to 1912, in the United States. Today Sui Sin Far is finally being rediscovered as part of American literature and history. She presented portraits of turn-of-the-century Chinese with an insider's sympathy. She gave voice to Chinese American women and children, breaking the stereotypes of silence, invisibility, and "bachelor society."

Handbook of Research on Children's and Young Adult Literature Shelby Wolf
2011-04-27 This landmark volume is the first to bring together leading scholarship on children's and young adult literature from three intersecting disciplines: Education, English, and Library and Information Science. Distinguished by its

multidisciplinary approach, it describes and analyzes the different aspects of literary reading, texts, and contexts to illuminate how the book is transformed within and across different academic figurations of reading and interpreting children's literature. Part one considers perspectives on readers and reading literature in home, school, library, and community settings. Part two introduces analytic frames for studying young adult novels, picturebooks, indigenous literature, graphic novels, and other genres. Chapters include commentary on literary experiences and creative production from renowned authors and illustrators. Part three focuses on the social contexts of literary study, with chapters on censorship, awards, marketing, and literary museums. The singular contribution of this Handbook is to lay the groundwork for colleagues across disciplines to redraw the map of their separately figured worlds, thus to enlarge the scope of scholarship and dialogue as

well as push ahead into uncharted territory.

Biography of Veer Savarkar: Inspirational Biographies

for Children Kavita Garg

2021-02-01 Vinayak Damodar

Savarkar was a brave and staunch patriot. He was born on 28th of May, 1883, in a village called Bhagoor near Nasik in Maharashtra. His parents were from a middle-class background. His mother, Radhabai was a religious lady. She was extremely kind and honest. His father, Pt. Damodar Pant was known far and wide for his knowledge. As a child, Savarkar used to be called ÔTatyaÕ by the family members. Mother Radhabai used to call her son ÔVinayakÕ with great affection. Vinayak, the little boy, was brought up with great love and care. Due to the religious environment at home, the child used to get a lot of opportunities to regularly listen to the chapters from the Ramayana and the Gita. This had a deep impact on his life.Ê

Learning from the Left

Julia L. Mickenberg 2005-11-10 At the height of the Cold War, dozens of radical and progressive writers, illustrators, editors, librarians, booksellers, and teachers cooperated to create and disseminate children's books that challenged the status quo. Learning from the Left provides the first historic overview of their work.

when both children's book publishing and American Communism were becoming significant on the American scene, to the late 1960s, when youth who had been raised on many of the books in this study unequivocally rejected the values of the Cold War, Learning from the Left shows how "radical" values and ideas that have now become mainstream (including cooperation, interracial friendship, critical thinking, the dignity of labor, feminism, and the history of marginalized people), were communicated to children in repressive times. A range of popular and critically acclaimed children's books, many by former teachers and others who had been blacklisted because of their political beliefs, made commonplace the ideas that McCarthyism tended to call "subversive." These books, about history, science, and contemporary social conditions-as well as imaginative works, science fiction, and popular girls' mystery series-were readily

available to children: most could be found in public and school libraries, and some could even be purchased in classrooms through book clubs that catered to educational audiences. Drawing upon extensive interviews, archival research, and hundreds of children's books published from the 1920s through the 1970s, Learning from the Left offers a history of the children's book in light of the history of the history of the Left, and a new perspective on the links between the Old Left of the 1930s and the New Left of the 1960s. Children's Biographies of African American Women Sara C. Vanderhaagen 2018-11-15
In Children's Biographies of African American Women: Rhetoric, Public Memory, and Agency Sara C. VanderHaagen.

examines how these biographies encourage young readers to think about themselves as agents in a public world. Specifically VanderHaagen illustrates how these works use traditional means to serve progressive ends and thereby examines the rhetorical power of biography in shaping identity and promoting public action. Drawing on scholarship in rhetoric, memory studies, and children's literature, VanderHaagen presents rhetorical analyses of biographies of three African American women—poet Phillis Wheatley, activist Sojourner Truth, and educator-turned-politician Shirley Chisholm—published in the United States during the twentieth and twenty-first centuries. VanderHaagen begins by analyzing how biographical sketches in books for black children published during the 1920s represent Wheatley and Truth. The study then shifts to books published between 1949 and 2015. VanderHaagen uses a concept

adapted from philosopher Paul Ricoeur—the idea of the "agential spiral"—to chart the ways that biographies have used rhetoric to shape the life stories of Wheatley, Truth, and Chisholm. By bringing a critical, rhetorical perspective to the study of biographies for children, this book advances the understanding of how lives of the past are used persuasively to shape identity and encourage action in the contemporary public world. VanderHaagen contributes to the study of rhetoric and African American children's literature and refocuses the field of memory studies on children's biographies, a significant but often-overlooked genre through which public memories first take shape.

The Important Book

Margaret Wise Brown
1990-03-10 The important thing about The Important Book -- is that you let your child tell you what is important about the sun and the moon and the wind and the rain and a bug and a bee and a chair and a table and a pencil and a

bear and a rainbow and a cat (if he wants to). For the important thing about The Important Book is that the book goes on long after it is closed. What is most important about many familiar things -- like rain and wind, apples and daisies -- is suggested in rhythmic words and vivid pictures. 'A perfect book . . . the text establishes a word game which tiny children will accept with glee.' -- K.

Hannabuss 1993 This title

examines the perceived value of biographical information and the way in which it is used by librarians and educationalists.

There is an historical view of literature, together with a

detailed investigation of contemporary material published for children. This book provides a critical and biographical guide to such materials, some of which are international, but with emphasis on British and American publications. Educational Method 1925 Social Progress 1924 *Helping Your Children with Reading and Writing at Home* Mary A. Colbert & William P. Colbert 2009-01-31 *Helping Your Children with Reading and Writing at Home* By Mary Ann Colbert & Dr. William P. Colbert There really is no place like home when it comes to developing competent readers and writers. And with the aid of our new world changing guide the process and the goal of developing lifelong readers and writers will be greatly facilitated. Many years ago we set about finding out what type of reading and writing help parents and other adults were giving children and how it was working, We asked everyone and anyone who would talk with us and we came up with

some rather startling information to share in our guide. Now talking with parents, grandparents. adults and children about the reading and writing activities they have experienced at home is second nature to us. Through the years, we have discovered that a great many things are happening in American homes relative to helping children in these areas and even greater things are possible. The purpose of our book (We like to call it a guide.) is to awaken parents, grandparents and other adults, who work with children, to the great possibilities that are open to them that will revolutionize learning now and for future generations. The ideas, suggestions and strategies in our guide step off from the interests of the learners (which are the best indicators of what the children are ready and able to learn next) as opposed to curriculums and textbooks which often have an iron grip on what is available for young students to learn. We show our readers how to take advantage

of the great knowledge they have about their children and how to use it to guide their children's learning., and, more especially. to identify what is the next appropriate step for their children to take in their learning. All this is done in the home setting with family members participating and sharing the fruits of their learning labors. Besides giant leaps in learning, families can expect outstanding growth in family interpersonal relationships. The family is actually drawn closer together by sharing their diverse interests.. At the onset of the guide adults are asked to compare their thinking on reading and writing learning with some of the experts in the field via a true-false checklist. This technique totally involves parents with the book from the start. and parents are often surprised to see how their thinking coincides with experts in the field. The next section contains three case studies that illustrate, in detail, exactly what some very effective adults did to further the reading and

writing skills of the children with whom they worked. The third sections contain some precise strategies that parents and other adults can begin using today with their children. The next sections identifies what children see as effective reading and writing strategies that are used by parents and their teachers. Section five is a summary of some ideas of some great teachers of reading and writing. The ideas here are undergirded by some sound learning principles which every adult, who works with children, will want to know about. The final section ends much like the guide begins with a checklist of some true - false items that will help guide parents and other adults to increasing success in helping their children with reading and writing at home.

Teaching Gifted Learners in STEM Subjects

Keith S. Taber
2017-07-31 This book offers an overview of programmes designed to support the learning of gifted and talented students in STEM subjects, both to allow them to meet their potential and to encourage them to proceed towards careers in STEM areas. The chapters from a range of national contexts report on perspectives, approaches and projects in gifted education in STEM subjects. These contributions

provide a picture of the state of research and practice in this area, both to inform further research and development, and to support classroom teachers in their day-to-day work.

Chapters have been written with practitioners in mind, but include relevant scholarly citations to the literature. The book includes some contributions illustrating research and practice in specific STEM areas, and others which bridge across different STEM subjects. The volume also includes an introductory theoretical chapter exploring the implications for gifted learners of how 'STEM' is understood and organized within the school curriculums.
