Practice and Theory for Materials Development in L2 Learning Alan Maley 2017-03-07 This volume represents a unique addition to the growing body of empirical literature on materials development, adopting a reverse approach to the topic. Rather than applying 'theory to practice', practitioners and researchers from 11 countries reappraise applied linguistics theories through practice. The book also provides evidence for the diversity of materials development around the globe at different levels for different specialities and for different purposes. Each chapter surveys the relevant literature (such as task-based learning and language and culture), describes a specific research project, reports the results of the project, and discusses the implications of these results for the development of materials both in the local context and in general. After each section there are editorial comments highlighting the issues emerging from the research, and there is a conclusion which connects the findings of the various chapters and makes suggestions both for future research and for the principled development of materials for L2 learners. The book will be suitable for teachers, materials developers, academics and students in post-graduate courses in applied linguistics, in TEFL/TESOL and in the teaching of other languages as an L2.

New Cutting Edge: Pre-Intermediate - Student S Book and Workbook: with Key Sarah Cunningham 2009

The Cutting Edge Bjørn Aris 2019-01-29 This book offers a number of ground rules for being successful at work, based on Eastern philosophies and martial arts, at the heart of which lies the right balance between reason and intuition. Concepts such as efficiency, the overall picture, proactive behaviour, breathing, the here and now, peace, freeing yourself of hindrances and perceiving what is true are the underlying principles of the classic Eastern martial arts, but they can also be directly applied to modern (business) life. The ground rules in this book are all you need to teach yourself to use your own strength to find the right answer to any situation in this constantly changing world and to be able to enjoy your work more, with less stress and strain. They lead to inner peace and give an insight into the overall picture. Achieving success no longer requires an effort - instead it becomes a state of being. Bjørn Aris has been studying the art of Eastern fighting and Zen philosophies for more than 35 years. After a 12 year career in investment banking, he moved on to become a successful entrepreneur, and since 2000 he has been working as a trainer and advisor to business executives in the corporate world. By effectively fusing Eastern wisdom with Western knowledge he has created the Mental Bridging (c) training programme, which makes sure you achieve better results with less effort or stress and more pleasure. Scientifically validated through academic studies in 2007 and 2012, it received an innovation award in 2013. More than 10,000 participants from 60 different countries have attended and benefitted from Bjørn's workshops
