*Low GWP Refrigerant Safety* Jason Obrzut, CMHE 2021-02-22 As the HVACR industry continues to move forward and innovate, the refrigerants that were once so commonplace are now being phased out. Replacing them are more energy efficient, environmentally friendlier refrigerants, known as Low GWP refrigerants. Many of these new refrigerants are

classified by ASHRAE as A2L, or slightly flammable. The industry is also seeing expanded use of some hydrocarbon (A3) refrigerants, such as propane and isobutane. Students and technicians will require additional training for the safe handling and transportation of these refrigerants. Training 101 2019-12-06 HVAC  
Training 101 is a site visited by  
over 100,000 enthusiasts  
monthly, who are interested in  
becoming HVAC technicians.  
The site initially began as the  
passion project of a retired  
HVAC technician. The site  
quickly gained popularity,  
building a strong community of  
aspiring HVAC technicians.  
Currently, it is managed by a  
team of ex-HVAC technicians  
with decades of experience in  
the industry. Head over to  
HVACTraining101.Com to  
learn more. We began by  
writing about how to become  
certified as an HVAC  
technician. With rules and  
certifications varying for each

state, it was a challenging task.  
We had a few friends in other  
states help us out, but for some  
states, we had to dig really  
deep to find the information  
needed. Our audience at the  
time was very happy with the  
information we provided. At  
this point, we started getting  
many questions about EPA 608  
certification. Once you get the  
education and experience  
needed to become a technician,  
prospective employers will ask  
for certification to handle  
refrigerants. When we started  
writing about how to become  
certified, viewers again  
requested we write a study  
guide to help them prepare for  
the 608 exams. The study  
guides out there were dense  
and had much more  
information than was needed to  
pass the test. This inspired us  
to embark on a journey to write  
the simplest study guide for the  
EPA 608 exam, which would  
still cover all the necessary  
information. We hope we have  
achieved our intended  
objective. The journey to  
becoming an HVAC technician  
can be long and arduous. We

congratulate you on taking this path and wish you the best in cracking the EPA 608 exam. constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the

forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
